Hi Laras,

How are you? I wish you good health! I would like to apologize for the data that was lost in February. But you don't have to worry because I have already backed up the data and I will send it to you right away. This problem actually often occurs because in the last two months every business feasibility request was only done orally and there was no proper system to assist in recapturing the data, so my team and I felt very overwhelmed. But you don't need to worry, because our bosses are developing the right inter-divisional SOPs on how they request data collection. Then, I also want to apologize for doing a miscalculation in December last year, after I checked the data again, the data was already used by the same formula as the previous month. It would be nice if we could discuss this again at next week's meeting, on Monday around 1-3pm if you wish. Thanks

Best Regards,

Yasin
