Name : Yasin Alfi Yahya / C2335F2883

Hello everyone, please introduce my name is Yasin Alfi Yahya. I'm here to try to give you something interesting about our products. Have you ever imagined, how much loss can be obtained due to fake job vacancies? Starting from material losses in the form of money, loss of personal data or even losses that can result in a threat to the applicant's family. It's Creepy isn't it? Therefore, introduce our product that is "Valicat". Valicat is an application that can help many people detect whether a job vacancy is valid or fake. With valicat, we can save a lot of people from fraudulent fraud due to crime created from a fake job posting. Be a part of the development of this application, to help many people in the criminal consequences of fake job vacancies.
